

# 50 YEARS YOUNG

The above Porsches represent milestones in Porsche production. Photography: LottieDesigns.com

**T**he elegant 1956 Speedster 356 is one of the first major Porsche production cars - the 'Porsche Baby'. You may even recognize it from its many silver screen appearances such as 'The Fast and the Furious', 'Top Gun' and 'The Fugitive' - classic films, classic car. This stunning 1956 Porsche 356 Speedster was brought to us by its Dubai-based Preston owner. The car had been misfiring badly due to worn carburetors. However, the Jasmine PorschaLink UK team managed to overhaul and refurbish the rare Pierberg carbs and get the car running back on full form again. Result - one very satisfied customer.

The second featured models are the sophisticated and stylish Porsche 997's - one of the latest mass Porsche production cars.

Things have come a long way since the birth of the Speedster and the 997 can only be described as an exceptional example of Porsche's latest state-of-the-art production. The above 997's are currently in for a regular 12,000 mile service which when finished, shall be returned to their owners, complete with official FSH service stamp and an invoice that leaves the customers confident that they have found the ultimate Independent Porsche Service Centre.

The old and the new sitting alongside each other represents the scope and capability of the services offered by Jasmine PorschaLink UK to maintain any model from any year from any of the Porsche family.

Jasmine is constantly investing in the latest state-of-the-art equipment to keep up with, if not ahead of, all latest Porsche

regulations. Our most recent improvement is the installation of a second Tecalemit two-post hydraulic lift ramp.

Need your car collecting from your office? No problem.

Require pricey genuine Porsche parts at discount prices? That's us.

Need an honest and reliable service? You've found it.

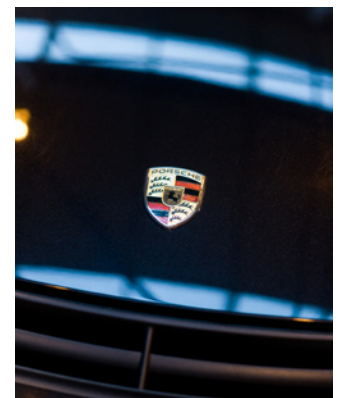

Do you only want qualified ATA Approved Technicians working on your prized Porsche? You've found us.
